

Reconfigurable Production in the Era of Industry 4.0

Towards a new EU research proposal:
scientific industrial exchange & idea generation

Nov 19 | 9:30 a.m. - 3 p.m. | Online

Distinguished academic and industrial speakers engaged in flexible and reconfigurable production have been invited to participate in the seminar and to explore commonly asked questions, including:

- How can production systems be **digitalized** to improve their reconfigurability?
- Which **new business models** can be created through means of servitization?
- Can reconfigurability enhance the **sustainability** of production systems?

It is our goal to provide a platform for interdisciplinary exchange and to create a basis for further research collaborations in the future.

We encourage you to join us on Thursday, November 19 at 9:30 a.m. CET to hear more about this fascinating topic and to engage in fruitful discussions.

Preliminary Agenda

- 09:30-14:00 Academic and industrial presentations
- 14:00-15:00 Group discussion and idea elaboration
